

An abstract graphic at the top of the page features a thick, flowing red liquid stream that curves from the left towards the center. This red stream merges with a grey, wireframe-like structure that resembles a network or a stylized 'Y' shape, extending from the top center towards the right. The background is a light, neutral grey.

# **The Future of Connectivity is Bonded. Your Next Big Opportunity is Here.**

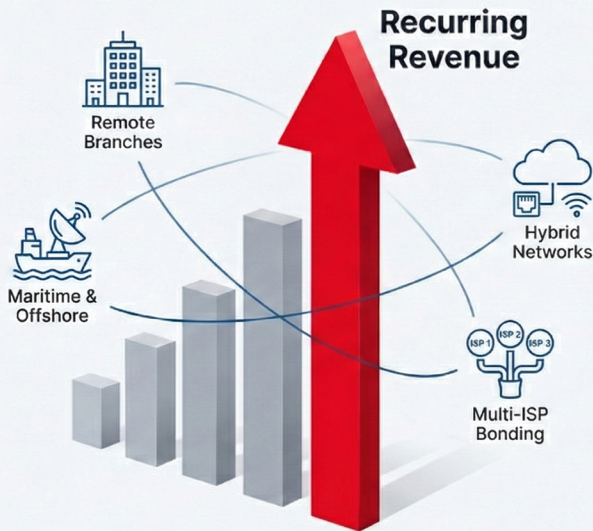

Offer your customers next-gen WAN bonding for ultra-reliable, high-performance connectivity by combining Starlink, Cellular (LTE/5G), Fiber, DSL, and Satellite into one Virtual Leased Line.

TRUSTED BY MSPS, VARS, AND CARRIERS TO POWER BUSINESS-CRITICAL CONNECTIVITY.

# Your Customers' Ambitions Are Capped by Their Connections

This isn't just an inconvenience; it's a business risk. Downtime from single-provider links, poor application performance, and the high cost of traditional leased lines are holding your customers back.

## This Connectivity Gap is Your Next High-Margin Service

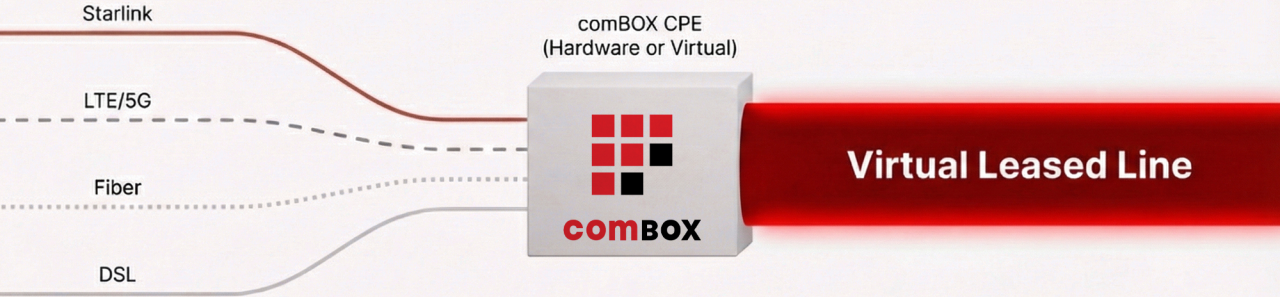

The demand for unbreakable, high-performance connectivity is a massive, untapped market.

Position yourself as an essential consultant solving your customers' most critical business need.

Our subscription-based service means you earn steady recurring income, not just one-off project fees.

# The comBOX Virtual Leased Line (VLL): A Single, Robust Pipe from Any Collection of Links

We bond any mix of wired and wireless links into one high-performance virtual connection, delivering the speed and reliability of a dedicated line through our ultra-fast global aggregation servers.

# This Isn't Load-Balancing. It's True Network Fusion.

## Real Bandwidth Aggregation

Our proprietary algorithm merges all ISP connections into a virtual fat pipe. You get true aggregation of all available bandwidth, not just intelligent session steering.

## Transparent Failover

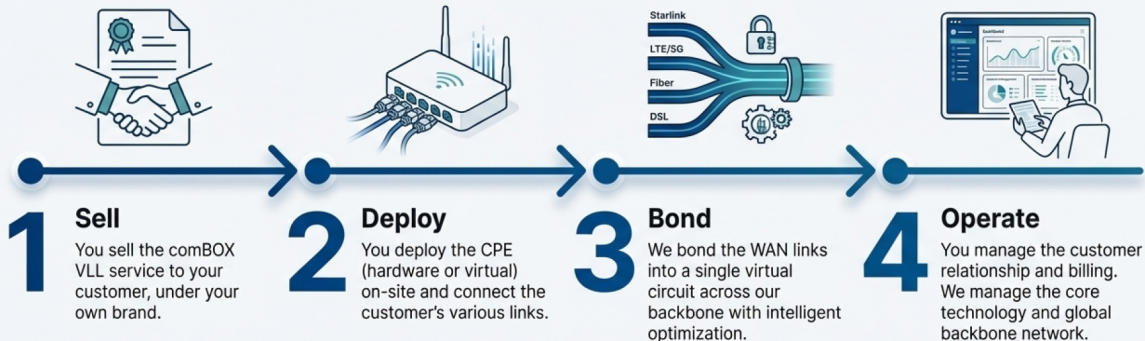

Achieve maximum uptime with our transparent, same-IP failover mechanism. Downtime risk is distributed across diverse network paths for uninterrupted connectivity.

## TCP Acceleration

Empower customers with our cutting-edge, built-in WAN optimization. Features include Quality of Service (QoS) prioritization and Starlink Optimization to boost productivity.

# A Turnkey Business Model Designed For You.

## The Outcome:

You gain a recurring revenue stream with minimal infrastructure investment. Your customer gets high-throughput, reliable, cost-efficient connectivity.

# The comBOX Partnership Advantage.

## Build Predictable Recurring Revenue

An attractive margin structure on service subscriptions creates steady income, moving you beyond one-off project fees.

## Go to Market Under Your Brand

Utilize our white-label offering to sell under your brand. Our platform supports flexible deployments with hardware CPEs, virtual appliances, and global PoPs.

## Zero Backbone Investment

Leverage our fully managed global backbone and distributed server network. We handle the infrastructure, so you can focus on sales and customer relationships.

## Differentiate Your Portfolio

Stand out from competitors by adding a premium, next-generation connectivity service that solves a critical and growing customer problem.

# Four Immediate Revenue Opportunities You Can Sell Today

## Hybrid Internet Access

---

**Target:** Customers who need 100% uptime.

**Solution:** Combine wired (Fiber/DSL) and wireless (LTE/5G) links for ultimate high availability and backup.

## LTE / 5G Bonding

---

**Target:** Remote, mobile, or temporary sites.

**Solution:** Deliver reliable high speed internet for maritime, offshore, and construction sites where traditional connectivity is unavailable.

## Satellite Link Bonding

---

**Target:** Users of Starlink or other satellite services.

**Solution:** Aggregate multiple satellite links to overcome single provider limitations and ensure consistent performance critical remote operations.

## ADSL/VDSL Bonding

---

**Target:** Branch offices and SMBs.

**Solution:** Offer a cost-effective bandwidth boost for customers who need more performance without the high cost of a dedicated leased line.

# A Simple and Supported Path to Partnership.

## Apply

Fill out our partner registration form. We review your profile and business fit.

## Enable

Get access to your dedicated partner portal, complete with marketing kit, pricing, technical documentation, and onboarding training.

## Launch

Start selling. Secure pilot customers, deploy the service through the portal, and bill your customer under your brand.

## Grow

Scale your deployments with dedicated onboarding, technical support, and a clear escalation path from our network experts.

# Become the Connectivity Leader Your Customers Need.

Partner with comBOX to deliver next-generation WAN bonding solutions. Get immediate access to our Partner Kit to unlock pricing, documentation, case studies, and marketing tools to support your sales.
